FORTIS CANCER INSTITUTE: **Transforming Cancer Care** **with Expertise & Innovation**

EMPOWERING LIVES GLOBALLY

IHH Healthcare is one of the world's largest private healthcare groups, uniting world-class expertise, advanced medical technologies, and a shared vision of delivering exceptional patient care. Its international footprint extends over 80 hospitals in **10 countries** including the key markets of Malaysia, Singapore, Türkiye and India. The company is listed on Bursa Malaysia and the Singapore Exchange.

IHH Healthcare

Supported by a dedicated workforce of **over 70,000 employees**, IHH offers a comprehensive range of healthcare services from primary to quaternary care, alongside complementary ancillary services. Its reputable portfolio comprises trusted healthcare brands such as Acibadem, Mount Elizabeth, Prince Court, Gleneagles, Fortis Healthcare, Pantai & Parkway.

Fortis Healthcare, as part of IHH, strengthens its ability to provide global standards of healthcare, fostering collaboration, innovation, and continuous learning. This connection enables us to offer patients in India access to cutting-edge treatments and best practices from around the world, particularly in cancer care, where advancements in medical oncology, radiation therapy, and surgical techniques provide patients with hope and healing through comprehensive, personalised treatments.

MESSAGE FROM MD & CEO

Cancer remains one of the most pressing health challenges worldwide, and India is no exception. With rising incidence rates and increasing complexities in treatment, access to advanced, precise, and timely care is critical. As a responsible healthcare provider, Fortis Healthcare is committed to bridging this gap by bringing world-class oncology care closer to patients.

At **Fortis Cancer Institute**, we have built a robust clinical programme that integrates cutting-edge technology, precision oncology, and a multidisciplinary approach to treatment. Our Molecular Tumour Board brings together leading oncologists, geneticists, and specialists to design targeted treatments based on each patient's unique cancer profile. By integrating genomics-driven therapies, CAR T-cell treatments, & personalised medicine, we ensure precise, effective, and tailored care. We also invest in the latest advancements, including MR Linac, Gamma Knife, and other next-generation radiation and surgical technologies, enabling us to treat cancer with greater accuracy and better outcomes.

For patients traveling from abroad, we understand that seeking treatment in another country can be overwhelming. That's why our international patient care team ensures a seamless experience from consultations with our leading oncologists to treatment planning and recovery support. Our hospitals are designed to provide not just medical excellence but also a compassionate and supportive environment that prioritises your comfort and well-being.

At Fortis, our mission is clear: to fight cancer with expertise, innovation, and empathy. We remain committed to offering globally benchmarked care, ensuring that every patient, no matter where they come from, has access to the best possible treatment and a renewed hope for the future.

Warm regards,

Dr Ashutosh Raghuvanshi (MD & CEO, Fortis Healthcare)

ABOUT FORTIS CANCER INSTITUTE

At Fortis, we are committed to advancing healthcare, with the Fortis Cancer Institute leading the way in cancer care. Our multidisciplinary approach involves over 250+ cancer specialists, providing comprehensive treatment across medical oncology, surgical oncology, radiation oncology and haematology.

Central to our approach is the tumour board, an expert panel of oncologists who collaborate on complex cases to create personalised, effective treatment plans, ensuring optimal patient outcomes. Our facilities, located in key cities like **Delhi NCR (Gurugram, Shalimar Bagh, Noida, Vasant Kunj, Okhla, Manesar)**, Mohali, Mumbai-Mulund and Bangalore-BG Road, are equipped with state-of-the-art technology and offer cutting-edge cancer care.

Fortis Hospitals are present across major metro and non-metro Indian cities, allowing patients to choose the location that best suits their needs, ensuring convenience and access to the highest standard of care.

From prevention to post-treatment care, we provide holistic services, including palliative care, nutritional support and rehabilitation. We remain at the forefront of innovation, ensuring patients have access to the latest advancements in cancer treatment.

WHAT SETS FORTIS CANCER INSTITUTE APART

Fortis Healthcare is renowned for its clinical excellence, cutting-edge technology and patient-first approach, setting it apart as a leader in healthcare.

Pioneering Technology and Innovation:

Fortis is at the forefront of medical innovation, offering CAR T-Cell therapy, Gamma Knife Esprit* (first in South Asia), MR LINAC*, High-Energy LINACs, PET-CT, Digital PET-CT*, SPECT, CT Simulators, SGRT, HIPEC, and Imaging

Technologies. These advanced technologies ensure high-precision treatments with minimal side effects, improving patient recovery and outcomes.

Advanced Oncology Treatments:

Fortis provides a multidisciplinary approach to cancer care with Immunotherapy, Targeted Therapy, Precision Therapy and Genomic Medicine. The Molecular Tumour Board plays a crucial role in crafting personalised treatment plans based on tumour genetics, ensuring the most effective, targeted therapies.

Global Expertise:

Treating patients from over 175 countries, Fortis has earned a reputation for world-class healthcare. Its innovative approaches, including Bone Marrow Transplants and cutting-edge surgical techniques, have made it a preferred choice for international patients.

Patient-Centered Care:

Fortis ensures a seamless, personalised experience, combining the latest technology with compassionate care. Whether for complex surgeries or routine treatments, Fortis focuses on delivering the highest standards of care at every step.

Fortis' dedication to clinical excellence, advanced technology and patient care truly sets it apart as a trusted healthcare provider.

*Available only at Fortis Hospital, Gurugram

COMPREHENSIVE CANCER SERVICES AT FORTIS CANCER INSTITUTE

At **Fortis Cancer Institute**, we are dedicated to providing exceptional care throughout your cancer journey, from diagnosis to treatment and beyond. Our multidisciplinary team ensures that every patient receives a tailored treatment plan, utilising cutting-edge technology and innovative therapies.

Medical Oncology

Our medical oncology department offers chemotherapy, targeted therapies, immunotherapy and precision treatments. We provide personalised treatment plans using the latest molecular diagnostics, ensuring the most effective therapy for each patient.

Surgical Oncology

Our surgical oncology team performs a variety of procedures, ranging from curative surgeries to minimally invasive surgeries, using advanced robotic techniques. We focus on precision and patient recovery, offering organ-preserving surgeries when possible.

Radiation Oncology

We employ advanced radiation techniques such as Intensity Modulated Radiation Therapy (IMRT), Stereotactic Radiation Surgery (SRS) and Gamma Knife for non-invasive treatment. These technologies provide precise targeting, reducing side effects and improving outcomes.

Haematology & Bone Marrow Transplant (BMT)

Fortis Cancer Institute specialises in the treatment of leukaemias, lymphomas and other blood-related cancers. We offer autologous and allogeneic bone marrow transplants, including haploidentical transplants for patients requiring complex care.

Nuclear Medicine

Our Nuclear Medicine services include state-of-the-art diagnostic imaging and targeted therapies, such as PET/CT scans, to detect cancers at their earliest stages. Nuclear medicine also provides specific targeted treatments, offering a highly personalised approach to cancer care.

Tumour Board and Personalised Care

At the heart of our comprehensive services is the tumour board, an expert panel of oncologists from multiple disciplines who collaborate on complex cases to determine the best treatment plan for each patient.

Holistic Support Services

We provide comprehensive support, including nutritional counselling, rehabilitation, psychosocial counselling, and more, focusing on your overall well-being during and after treatment. Additionally, palliative care plays a crucial role in our holistic approach. Our palliative care team is dedicated to providing pain relief, symptom management, and emotional support, ensuring the highest quality of life for patients throughout their cancer journey.

ADVANCED TECHNOLOGY

At **Fortis Cancer Institute**, we believe in combining the best of medical expertise with state-of-the-art technology to provide the most effective and accurate cancer treatment. Our commitment to innovation ensures that patients have access to cutting-edge technologies for diagnosis, treatment and recovery.

CAR T-Cell Therapy

This is a revolutionary treatment for cancers, particularly blood cancers like leukaemia and lymphoma. This immuno therapy harnesses the power of the patient's own immune system to target and destroy cancer cells, offering hope to patients who have not responded to traditional therapies.

Gamma Knife

Fortis Cancer Institute is equipped with Gamma Knife, a non-invasive technology for treating brain tumours. This highly precise system delivers targeted radiation to the tumour, minimising damage to surrounding healthy tissue and enabling quicker recovery times.

Genomic & Precision Medicine

Our use of genomic medicine allows us to offer personalised treatments tailored to a patient's specific genetic makeup. Through advanced molecular diagnostics and next-generation sequencing, we can identify mutations and guide more effective treatment choices, optimising patient outcomes.

Next-Generation Sequencing

Fortis Cancer Institute employs Next-Generation Sequencing to identify genetic mutations in cancer cells, allowing for better-targeted therapies. This technology helps us tailor treatments based on the specific genetic profile of each patient's tumour.

Robotic Surgery

Our Da Vinci XI robotic system offers patients minimally invasive surgery options with enhanced precision and quicker recovery times. Robotic surgery allows for smaller incisions, reduced pain and shorter hospital stays, promoting faster healing.

MR Linac

Fortis Cancer Institute features North India's first MR Linac, a cutting-edge technology that integrates MRI and radiation therapy. This allows for precise tumour targeting in real-time, reducing side effects and improving the overall quality of life for patients.

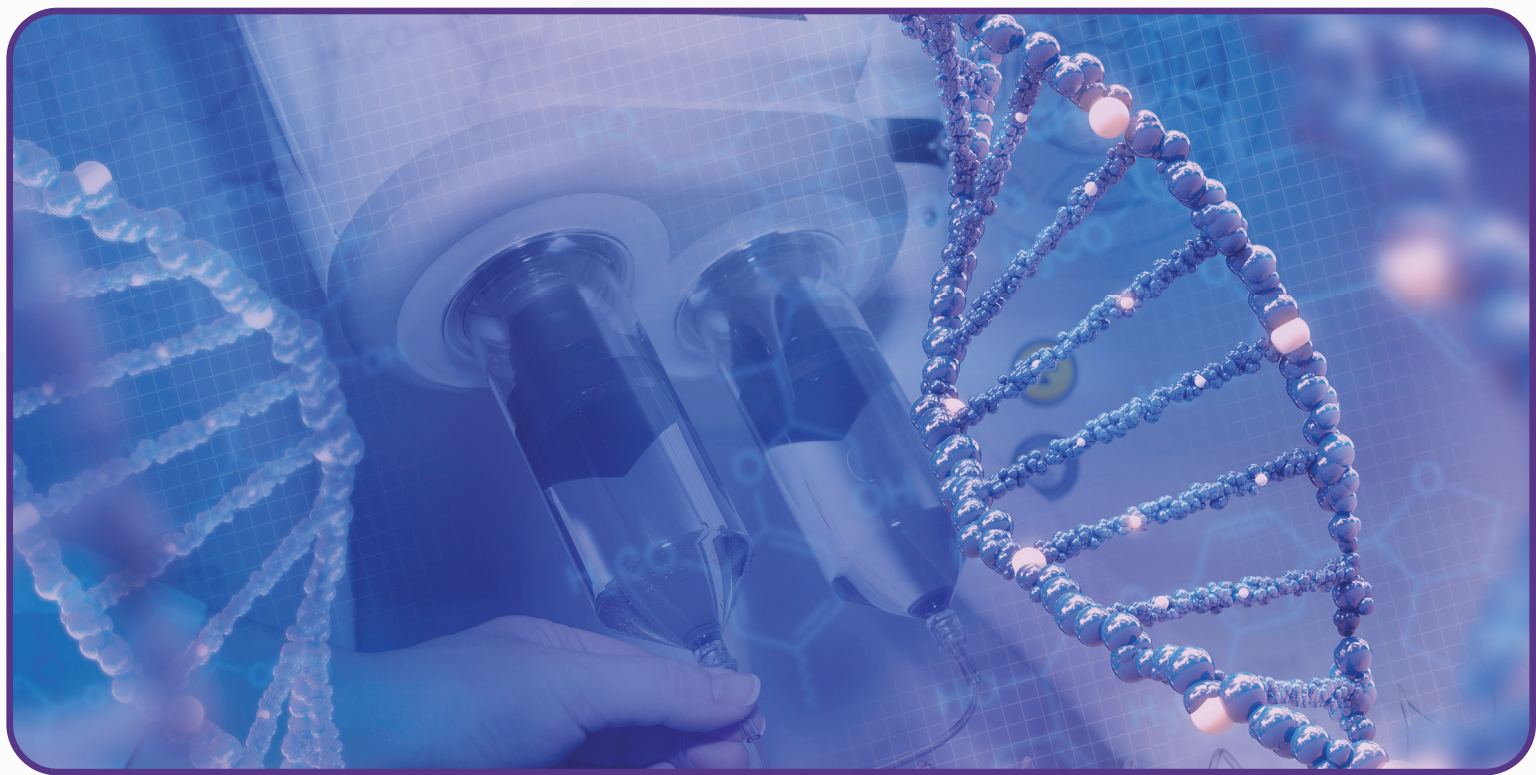

IMRT & SBRT

Intensity Modulated Radiation Therapy (IMRT) and Stereotactic Body Radiation Therapy (SBRT) deliver highly precise radiation to tumours while sparing healthy tissues. SBRT offers a non-invasive, high-dose radiation treatment for cancers in the lungs, liver, and spine, reducing treatment sessions and improving patient comfort.

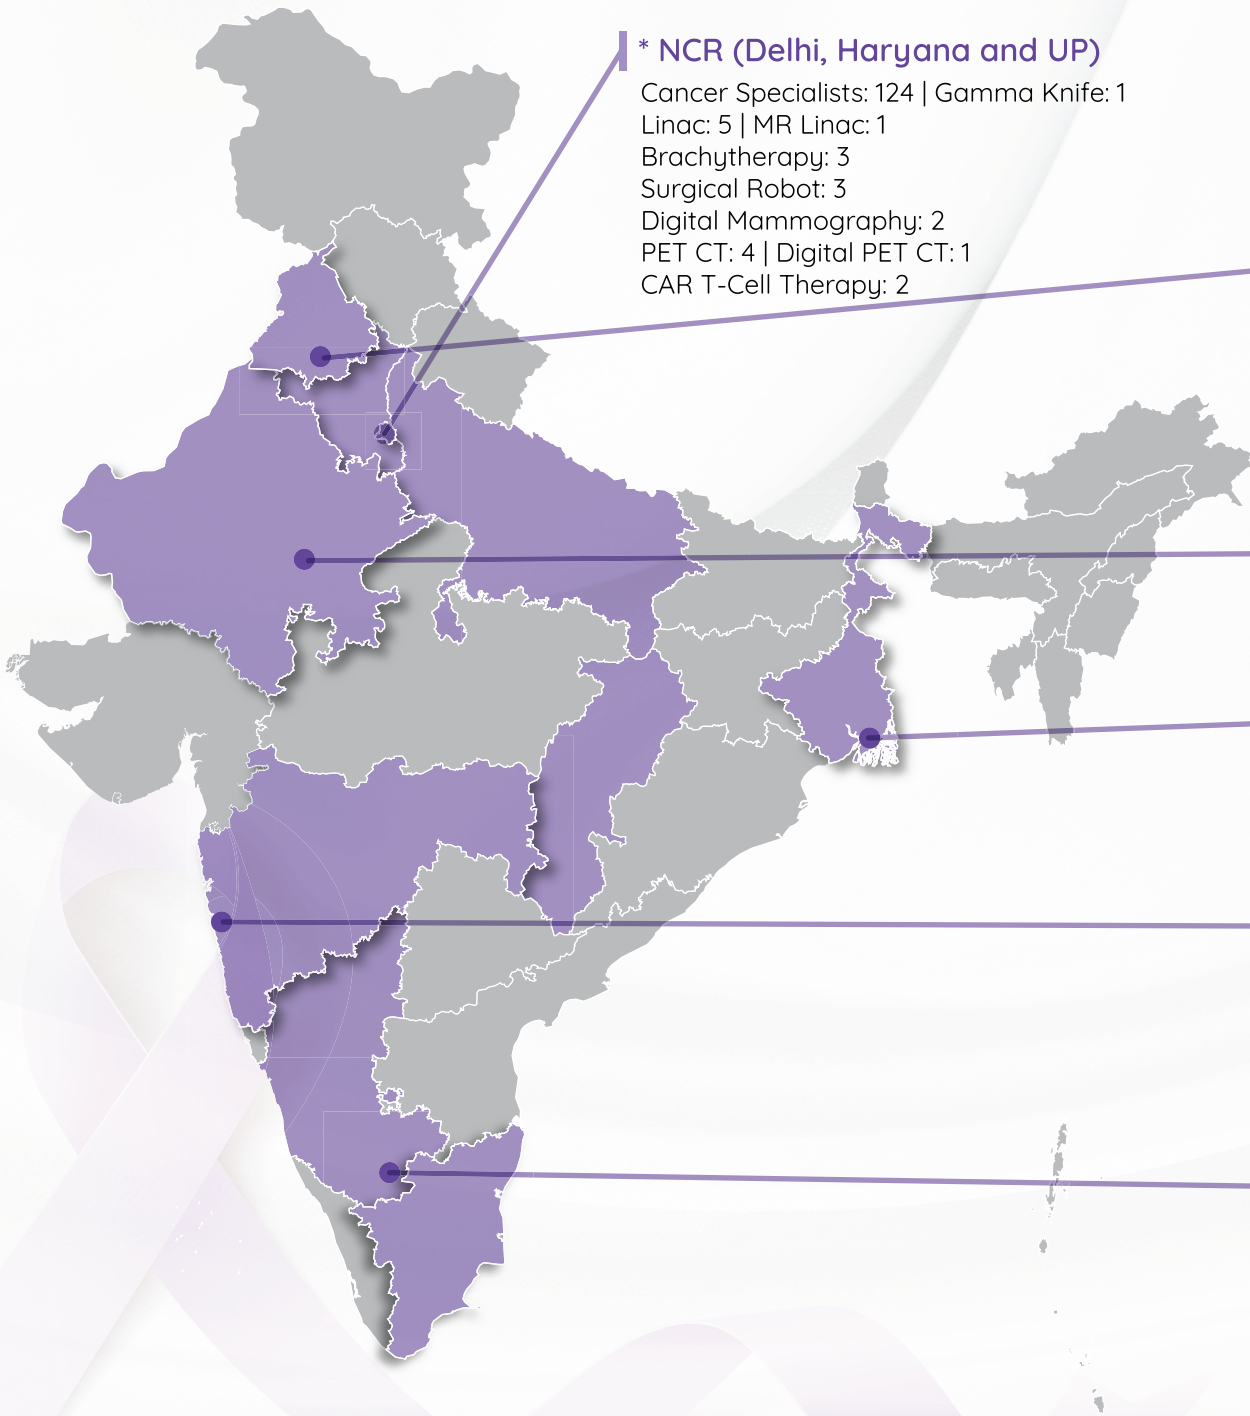

Imaging Technologies

We utilise the most advanced imaging technologies such as PET/CT scans, digital PET and SPECT CT to accurately diagnose and assess cancer, ensuring precise treatment planning and monitoring of treatment progress.

INTERNATIONAL PATIENT SERVICES

At Fortis, we are dedicated to delivering world-class healthcare with a seamless and supportive experience for patients from across the globe. With advanced treatments and state-of-the-art facilities, we provide care for a broad range of medical needs, including Robotic Surgeries, Kidney Transplants, Liver Transplants, Bone Marrow Transplants (BMT), and CAR T-Cell Therapy.

Patients from regions such as the Middle East, Africa, CIS, SAARC, and the Pacific Islands trust us for our expertise and compassionate care. Our experienced doctors, skilled nursing staff, and multidisciplinary teams work together to ensure superior clinical outcomes and holistic support throughout the treatment journey. We offer a range of services designed to simplify and enhance the patient experience, including interpreter assistance, comfortable consultation lounges, and comprehensive guidance for travel and logistics. Our integrated approach extends to telemedicine, e-consultations, and post-discharge follow-ups, ensuring continuity of care wherever patients may be.

At Fortis, our commitment is to make the healing process as smooth and stress-free as possible for every individual who walks through our doors.
