Care.
For good.

FORTIS EYE INSTITUTE, FMRI, GURUGRAM

“YOUR VISION, OUR EXPERTISE,,

1 SEE THE WORLD CLEARLY AGAIN

At Fortis Eye Institute, FMRI, Gurugram, we understand the impact cataracts can have on your daily life. Blurry vision, difficulty in focussing or glare can make it difficult to enjoy the things you love. Our team of experienced ophthalmologists is dedicated to helping you regain clear vision with advanced cataract surgery techniques and latest generation of intraocular lens. The cataract surgery is done with refractive approach to decrease your dependence on spectacles including presbyopia reading glasses.

2 BENEFITS OF CATARACT SURGERY AT FORTIS EYE INSTITUTE:

- **Improved Vision:** Experience a significant improvement in your near, far, and intermediate vision.
- **Minimally Invasive Procedures:** We utilize state-of-the-art technology for a comfortable and faster recovery.
- **FLACS Laser Technology:** Experience the precision and safety of bladeless, femtosecond laser-assisted cataract surgery (FLACS) for complicated cataracts.
- **Personalized Care:** Our ophthalmologists work closely with you to develop a customized treatment plan for optimal results.

3 MICROINCISION CATARACT SURGERY

The cataract is broken into multiple small pieces, emulsified by an ultrasonic technique and removed through a very tiny incision. The cataractous opaque lens is replaced by a customized foldable intraocular lens to make you see clearly. MICS involves making a very tiny incision to operate on cataract which translates to:

- **Enhanced Precision:** Allows for a more predictable and tailored surgical experience.
- **Gentler Procedure:** Minimizes tissue disruption for faster healing and reduced discomfort.

- **Improved Outcomes:** Provides the foundation for sharper vision and potentially reduces the risk of complications.

This micro incision and breaking the cataract into small pieces can also be done by femto laser assisted technique FLACS for precision and safety in complicated cataracts.

4 PREMIUM INTRAOCULAR LENS (IOL) OPTIONS

We offer a variety of premium intraocular lens (IOL) implants to meet your individual needs. All cataract surgeries are planned on sophisticated Optical Biometry machines to calculate your exact intraocular lens power to reduce your dependence on glasses for distance, intermediate and near. Many of our patients do not need spectacles post cataract refractive surgery and enjoy this aspect of surgery.

5 THE COMPREHENSIVE CARE YOU DESERVE AT FORTIS EYE INSTITUTE

- **Experienced Ophthalmologists:** Our team is highly skilled and experienced in performing advanced cataract surgery techniques.
- **Advanced Technology:** We are equipped with the latest diagnostic and surgical equipment to ensure the best possible care.
- **Comfortable & Convenient Experience:** We prioritize your comfort throughout the entire process as a day care procedure.
- **Focus on Patient Education:** We provide comprehensive information & answer all your questions, specially regarding the choice of intraocular lens so you can make informed decisions.
